

Machining Solutions Equipment Rental

With a reputation built on technical excellence and integrity, Glacier Energy Services is recognised as the leading machine solutions provider. Our Engineering diversity enables us to design and manufacture a vast range of specialised modular and ancillary equipment.

By using only the pinnacle of technology, our manufacturing workshop produces ancillary items for a wide range of bespoke requirements.

As always at Glacier Energy Services, our safety culture is paramount to us. We strive to encourage a positive attitude to safety which is carried out both on and offsite.

Glacier has an extensive suite of rental equipment with highly responsive and dedicated staff.

Our rental fleet includes:

- Pipeline Equipment (upto a diameter of 80" and +/- 0.5mm welding preparation performance)
- Pipe Coating Removal Machines
- Casing & Conductor Cutting Machines
- Flange Facing Machines (capable of machining upto 120" diameter)
- Milling Machines
- Drilling/Boring & Tapping Machines (capable of boring upto 1.4m diameter)
- Hydraulic Power Units
- Trepanning Equipment

Bespoke equipment can be designed and manufactured to customer specifications and can be provided as rental to suit customer requirements.
