

Glacier's Machining Solutions; precision cold cutting technology

Glacier designs and manufactures precision machinery and tools for pipe cutting, flange facing and pipe coating removal, all of which can be purchased outright or hired in flexible terms. Originally founded as Roberts Machining, the Clyde range of products set the industry

Regarded as the best pipe cutter and beveller machine manufacture in the world, Glacier offers three ranges of cutting equipment - Clyde, LC Clyde and LLC - for subsea, topside and single man use. Our equipment is renowned for its accuracy of cut, 100% rigidity during cutting, efficiency, ease of maintenance, decontamination and longevity.

Our bespoke engineering arm concentrates on the manufacture of specialist machines for on-site subsea or surface machining applications. Glacier's expert engineers use the latest CAD and CAM technology to design our decision equipment for the oil and gas industry.

We build our products to last, so you can expect in the region of 20 years of service from your machine. You can also rely upon our team to deliver full technical support and training whenever and wherever it's required.

A well-earned, world class reputation

- Pipe cutting & bevelling equipment
- Pipe coating removal machines
- Casing & conducting cutting machines
- Flange facing equipment
- Milling Machines
- Drilling & boring machines
- Hydraulic power packs
- Subsea threading machines
- Other services
