

Glacier's Machining Solutions; providing onsite machining worldwide

Glacier is a specialist provider of all aspects of onsite machining delivery, performed by experienced technicians, utilising an extensive range of equipment. The business operates from bases across the UK, with partners in the USA and UAE.

Glacier operates in the offshore energy markets for both topside and subsea applications, construction yards, Petrochemical and Power Generation Industry. It also has a niche market position by providing specialist onsite machining solutions to support various global OEM's products. It has a leading position with the executing of major projects in the UK Continental Shelf and on International projects.

Holding a truly independent position in the market, Glacier is committed to the highest standards of safety and service quality, taking pride in its "right first time" culture. Glacier is highly responsive to its clients' complex challenges, by providing engineering solutions in conjunction with our in-house technical design team and manufacturing facility
